

Safe City Networks

WizLAN Ltd.

Safe City and public WiFi access are today's basis for modern urban living.

City networks require highly reliable and secured network infrastructure spread around the city connecting PoE and non-PoE endpoint devices such as IP cameras, WiFi access points, public IP phones, PLC controllers, sensors etc. .

CityNet outdoor switches should support flexible high-speed connectivity, versatile high-power PoE capabilities, dry contact I/O and serial i/f to enable flexible connectivity and uncompromised availability.

WizLAN's WI-1200 outdoor Gigabit PoE switch is the optimal building block for Safe City and CityNet infrastructure
