

CI, Ind. & Sec. Networks

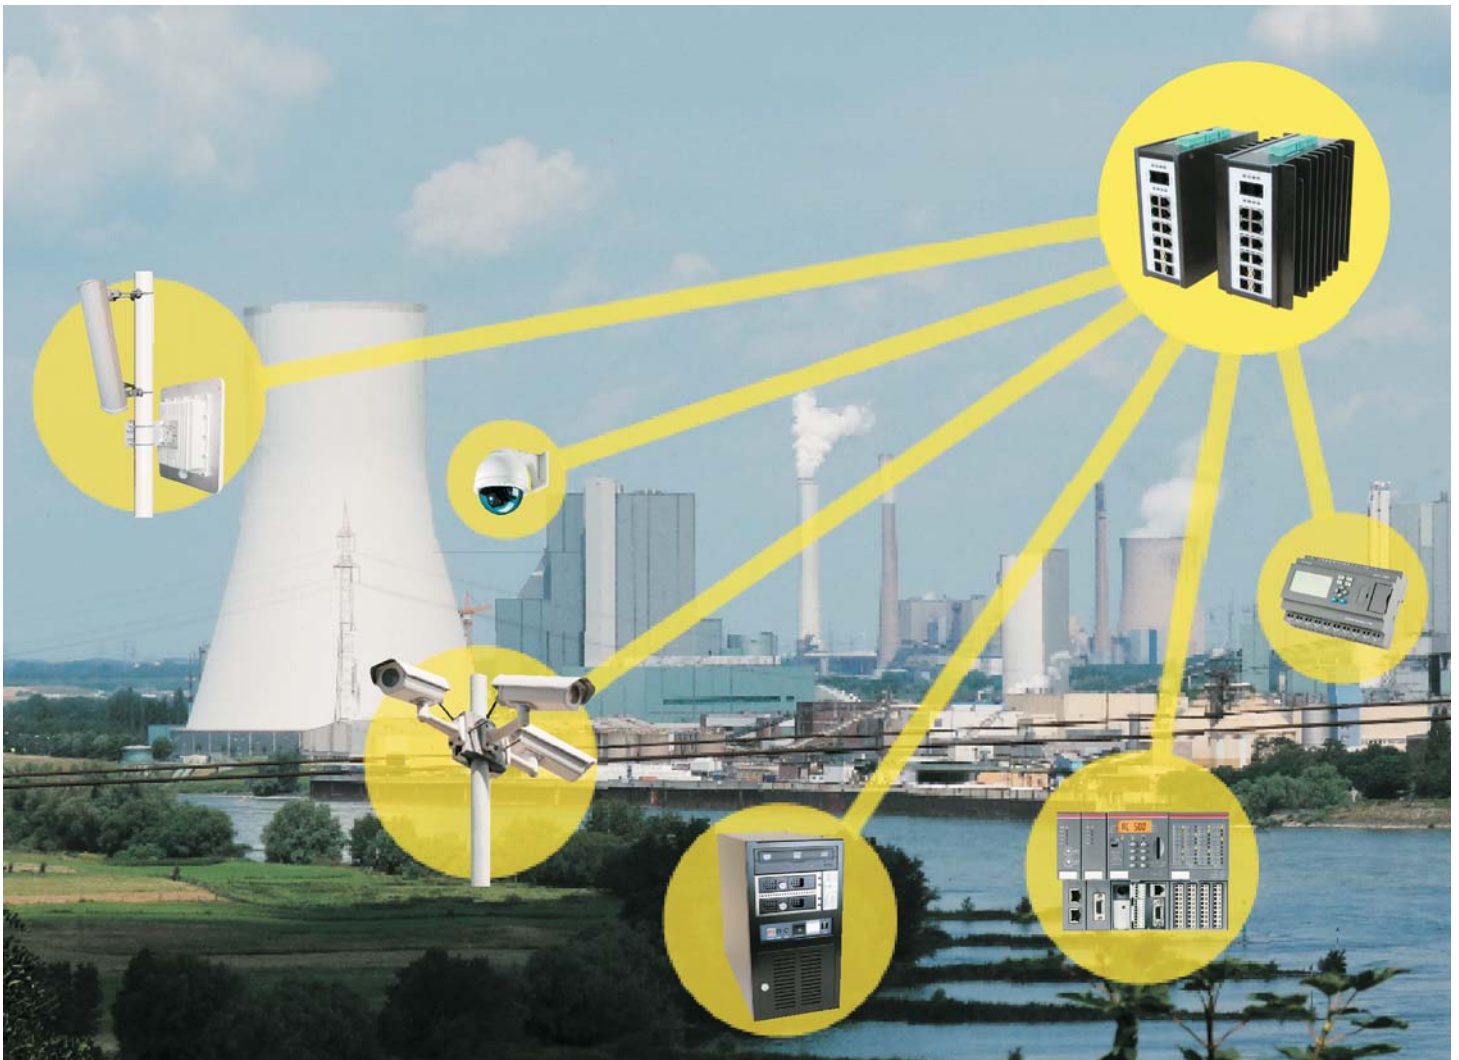

Critical Infrastructure, Industrial and Security networks require highly reliable and secured network infrastructure connecting PoE and non-PoE endpoint devices such as IP cameras, WiFi access points, PLC, Industrial PC etc. .

The network switches should support flexible high-speed connectivity, versatile high-power PoE capabilities, dry contact I/O and serial i/f to enable flexible and reliable connectivity as well as uncompromised availability.

WizLAN Ltd.

*Electric, Hydro and Chemical Utilities; Mass Transportation, Highway monitoring & control
Nature & environment monitoring*

WizLAN's WI-1200 outdoor/industrial Gigabit PoE switch is the ultimate building block for Critical Infrastructure networks
